## **Headlight Restoration**

**Price: \$80.00**

Headlight restoration is a process of renewing or refurbishing the surface of foggy, hazy, or yellowed headlights on vehicles. Over time, exposure to UV rays, environmental contaminants, and other factors can cause the plastic lens of car headlights to degrade and lose their clarity. This not only affects the appearance of the vehicle but can also impact the efficiency and effectiveness of the headlights, reducing visibility at night and posing a safety hazard. Here at ReBourne Detailing, we restore your foggy, hazy, or yellowed headlights with professional chemicals and applications.
